The Accuphase T-100 tuner is simply a masterpiece. I haven't used mine in years since I listen mostly to CD's now. Actually, I would sell it for the right offer. If you listen to radio, you should try one of these. Accuphase equipment is the best of its kind ever. This tuner picks up far away and weaker signal better than I have ever seen before.

Accuphase tightly controls their service manuals. While a few have leaked onto the web, I've never seen one for a tuner other than the early T-100 I was able to convert my T-108 from European to US spec without a manual.

Hi, I recently own a nice old, Accuphase T 100 tuner. As I intend to refurbish, I was searching for the service manual to make a list of capacitors I need. Strange but true, most of the schematics I found indicate 4 PSU capacitors (2 x 3300/35 and 2 x 3300/25V) positioned on the left and right side of the transformer, but my tuner has inside only two capacitors of 3300/35V.
