The large distance between side frames, the large throat depth, and the sectionalized punch holder make the HFB press brake a truly versatile machine. In response to the most demanding bending problems, Amada Promecam has developed the HF 700 backgauge with up to 8 independently programmable axes. (Y1, Y2, X1, X2, R1, R2, Z1, Z2).

countries. The mastery of deflection is of greater consequence to precision bending, as without it, electronic and hydraulic monitoring on press brakes cannot be claimed as being effective.

[Hydraulic Press-Brake - AMADA GmbH](#)

AMADA offers a wide range of down-acting precision press brakes. The eco-friendly HD NT Series is an electric/hydraulic, down-acting system that delivers superior accuracy. This high-performance series features a Hybrid Drive system that is engineered for low energy consumption and requires less hydraulic fluid than conventional machines.

[Press Brakes - Press Brake Machines | AMADA AMERICA](#)

To obtain this precision, AMADA PROMECAM has equipped its press brakes with a hydraulic bending depth valve. First advantage: the hydraulic stop allows the forming of a bend to the desired angle without trial-and-error, and without extra handling of the sheet, by progressive control of the angle during bending.

AMADA's Fixed Height (AFH) press brake tooling reduces setup time, limits clamp interference and creates precise bend angles. AFH tooling utilizes punch profiles that are taller and narrower providing a larger part bending area. Multiple punch and die profiles have a common height, making brake setup fast and stage bending easy.
