It is recommended, as a result of this study, that more lectures be organized in the form of a concept map at the introductory university level in biology. The purpose of this study was to determine whether or not a concept map organizer improved recall of lecture material in an introductory university biology course to a statistically significant degree over an outline organizer.

Developmental biology is the study of how a single cell, the fertilized egg, gives rise to a new organism. This is surely one of the most inspiring processes in biology and has fascinated scientists since ancient times. In just over seven weeks, a fertilized human egg, shown here on the left, gives rise to an embryo with many recognizable features.

*Our Definition: "Ecology is the scientific
study of the processes regulating the
distribution and abundance of organisms and
the interactions among them, and the study of
how these organisms in turn mediate the
transport and transformation of energy and
matter in the biosphere (i.e., the study of
the design of ecosystem structure and
function).*
