So, the map label "19" corresponds to a barometric pressure of 1019 mb, the map label "20" corresponds to 1020 mb etc. (a) On the air pressure map (p.19), draw isobars (lines connecting points of equal pressure). Draw the isobars at 4 mb intervals, starting with 1004 mb. Remember: isobars are like lines on a topography map - they do not cross.

To draw isobars, find the highest or lowest air pressure value on the map. If you chose the highest value, then your highest isobar will be the one that is closest to, but not exceeding the highest air pressure value. The 1012 isobar was chosen because the highest air pressure reading on the map was 1014.

Have them pay attention to the lines and ask what they might represent. Guide their thinking by asking them to notice the spacing between the lines near the centers of high and low pressure. Higher pressure = lines are further apart; lower pressure = lines are closer together. These are called isobars, lines of equal air pressure.
